## Serving the most demanding markets – including over 80,000 wind turbine slip ring installations worldwide.

With over 60 years of expertise, Everaxis specializes in the design, maintenance, repair, and replacement of slip rings, RF joints, and twist capsules. As a global leader in high-performance rotating solutions, we serve the most demanding markets and boast over 80,000 wind turbine slip ring installations worldwide. **Everaxis provides a full suite of services for maintaining, repairing, and replacing diverse technologies.**

### MAINTENANCE

Everaxis offers a diverse range of maintenance services tailored to our clients' needs, from simple seal replacements to full electronic rebuilds. Scheduled maintenance packages are also available to ensure optimal operation of your rotating systems.

### REPAIR

Our team of experts knows the products we manufacture and service inside and out, so we can repair a variety of technologies from several manufacturers. Our goal is to get you back up and running as quickly and efficiently as possible. The more concise information you provide to our staff about your issue, the faster we can troubleshoot to find the problem and provide a solution.

### REPLACEMENTS

When repairs are not feasible, we offer complete replacement units to restore functionality swiftly. We can collaborate on an emergency OEM stocking plan to minimize lead times and expedite the replacement process.

#### Benefits of Everaxis MRO Program:

- Plug and Play
- Highly reliable OEM quality products
- Replacement at identical
- Recognized and qualified manufacturers from major Wind turbine Manufacturers
- One qualified source for all On-Shore and Off-Shore OEM 1MW to 10 MW programs
- Product designed for up to 200 million rotations
- Reduced maintenance program each #70 million rotations
- Light maintenance assistance guidelines
- Heavy maintenance at Everaxis facilities

#### About Everaxis Industries

Everaxis is a recognised world-leading designer and manufacturer of customised slip rings to meet specific customer requirements for the transmission of power, data, optical and RF signals – including contactless solutions, pneumatic couplings, and fiber optic rotary joints. Everaxis' technology offers compact, reduced-size, and maintenance-free slip rings, capable of operating in harsh environments. Applications include wind turbines, food and beverage machines, robots, the nuclear and oil & gas industries and more.
